* production capacity depends on the mix used and the room temperature

** other voltages and cycles available upon request

Features

Stainless steel pressurized gear pumps

Adjustable overrun

Automatic HOM system

Stainless steel beaters

Direct expansion cooling cylinders

Adjustable ice cream flow

Refrigerated tanks with thermostatic system

Benefits

Ensure the best ice cream texture, quality and high overrun

With a simple operation, the overrun is adjustable from 40% to 80%

To constantly control the ice cream consistency

High efficiency beaters with double spirals and idler for a soft and creamy product

Optimize refrigeration efficiency for fast freeze downtime, less waste of product ensuring higher quality and energy saving

Adjustable product flow to meet your specific dispensing speed and volume requirements

To store mix overnight at hygienically ideal temperature
