

GEORGIA III STATIC

ENG

new!

GIII

The best care for your sweets.
No more drying!

This luxury cabinet is intended for the presentation and sale of sweet pastries, especially those filled with whipped cream, butter cream or custard. Static cooling is provided in the whole display area as there are 3 separate evaporators placed under each shelf. Static cooling does not lead into drying of the sweet pastries as it is usual when using forced air cooling.

GIII
