

FastTop

The fastest one

zumoval

Features

Our juicers are totally automatic:

There is no need to cut the oranges in half. Just place the oranges in the feeder basket and the machine will do everything for you at a high speed.

Our exclusive and unique rotating system is very attractive and visible, which attracts the attention of consumers, hence increases juice demand.

While squeezing, the juice is not in contact with the peel, avoiding the contact of the bitter taste with the juice.

Equipped with a 0.75 Hp motor and gears of steel, the FastTop model is certainly within the range of small equipment, the strongest and most robust machine on the market.

The machine is totally maintenance free.

Easy to dismantle, which takes only one minute, cleaning is really easy and will take less than 3 minutes.

Places with high consumption

- ✕ Supermarkets
- ✕ Large hotels
- ✕ Locations with high demand

Capacity

45

Fruits per minute

200

Litres per hour

The fastest juicer on the market

The best solution for places with high consumption, large hotels, supermarkets, etc.

Machine options

ORANGE COUNTER

Counts the amount of oranges that have been juiced by the machine, allowing the customer to monitor consumption.

00525

AUTOMATIC SHOWER

This option provides a flushing system that cleans quickly the juicing area, saving time and labour cost and keeping the juicer clean and hygienic at all times.

SELF SERVICE TAP

The easy-to-use automatic tap is connected directly to the motor of the machine. Open the tap and the machine starts running. Close the tap and the machine stops. Perfect solution for buffet services. Anti-dripping system.

COLOURS

Stand options

STANDS

The FastTop model allows the possibility to incorporate the Dispenser stand, Self service stand and Cooled dispenser stand.

JUICE LEVEL DETECTOR

Thanks to this system you can always count on 5 litres of fresh orange juice, automatically and constantly juiced, ready to serve. This system is ideal for self-service and big volume sites.

BIG CAPACITY JUICE FILTER

Stainless steel Juice Tray and filter, specially designed for buffet service and supermarkets with high consumption. The juice tray has a big Filter with high capacity, double-curved design and a pulp moving stick (Pulp-away system). This option allows squeezing more than 20 liters of juice without cleaning the filter.

Self service stand

Cooled dispenser stand
